EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Mixon on 06/03/2011.

The application has been amended as follows:

Replace claim 1 with the following --

1. A lottery system/ slot machine interface comprising;
a detection means operative to detect selected slot machine event occurrences and output event occurrence notification signals upon detection of said selected event occurrences;
interface means operative to detect said event occurrence notification signals from said detection means, analyze said event occurrence notification signals and output lottery entry ticket printing operation commands; and
printing means operative to receive said lottery entry ticket printing operation commands from said interface means in connection with a state-run lottery and print a lottery entry ticket. --

Replace claim 7 with the following --

Art Unit: 3714

7. The lottery system/slot machine interface of claim 1 wherein said printing means further comprises a manual input means operative to permit entry of lottery-specific characters for the lottery entry ticket. --

Replace claim 15 with the following --

15. A slot machine in combination with a state-run lottery system operative to accept lottery entries; and a lottery terminal/ slot machine interface including;

a detection means operative to detect selected event occurrences on said slot machine and output event occurrence notification signals upon detection of said selected event occurrences;

an interface means operative to receive said event occurrence notification signals from said detection means, translate said event occurrence notification signals and output state-run lottery system operation commands;

a lottery entry output means operative to receive said state-run lottery system operation commands and print an entry ticket into a lottery event operated via said state-run lottery system; and

said state-run lottery system in information transmission connection with said interface means via said lottery entry ticket output means, said state-run lottery system operative to receive said state-run lottery system operation commands output by said interface means and output preselected state-run lottery system responses corresponding to said state-run lottery system operation commands. --

Replace claim 25 with the following --

Art Unit: 3714

25. A slot machine in combination with a state-run lottery system operative to accept lottery entries; and a lottery terminal/ slot machine interface including;

a detection means operative to detect selected event occurrences on said slot machine and output event occurrence notification signals upon detection of said selected event occurrences;

an interface means operative to receive said event occurrence notification signals from said detection means, translate said event occurrence notification signals and output state-run lottery system operation commands; and

a lottery entry output means operative to receive said state-run lottery system operation commands and output a printed entry ticket into a lottery event. --

Replace claim 50 with the following --

50. An electronic gambling game comprising:

A slot machine that generates and responds to slot machine events in response to player input;

a state-run lottery device that issues a verifiable printed lottery entry ticket to a lottery event in response to said slot machine events; and

a redemption device associated with the state-run lottery device that verifies said printed lottery entry ticket in response to the outcome of said lottery event and issues payment for winning entries. --

Replace claim 51 with the following --

51. An electronic gambling game comprising:

Art Unit: 3714

means for generating a verifiable printed lottery entry ticket to a state-run lottery event in response to slot machine inputs and outputs;

means for issuing said verifiable printed lottery entry ticket to a state-run lottery event in response to said slot machine inputs and outputs; and

means for redeeming said verifiable printed lottery entry ticket using lottery entry verification means responsive to the outcome of said state-run lottery event. --

The following is an examiner's statement of reasons for allowance: Claims 1,15,25,50, and 51 distinguishes over the prior art in that the prior arts do not teach a lottery system slot machine with a detection means to detect selected slot machine event occurrences and out put occurrence notification signals, interface means to detect the occurrence notification signals and analyze the signals and output lottery ticket printing operation commands, which causes a lottery entry ticket to be printed by the printing means based on the output lottery ticket printing operation command.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adetokunbo Torimiro whose telephone number is (571) 270 1345. The examiner can normally be reached on 8-4.
